February 2026

SUBJECT
WIFI CAMERA FW RELEASE

Release notes for WIFI hybrid camera 4MP (340WIPSN)

1) BINDING ABILITY FOR APP (AS ALL FW 5.3.0)

Allows the camera to be securely bound to the mobile app, consistent with all firmware version 5.3.0 devices.

2) NEW LANGUAGE SUPPORT

Firmware 5.3.0 adds full support for the Ukrainian language.

3) DEFAULT PROTOCOL FOR WEB

Web access now uses HTTPS by default, with secure communication over port 443.

4) ABILITY TO CHANGE FONT COLOUR AND SIZE

Enables customization of font color and size for date, time, OSD text, and camera name.

5) SUPPORTS CHECK POINT

Adds compatibility with Check Point security systems.

6) INDICATION LAMP FOR CONNECTION STATUS

Provides a visual LED indication to show the camera's connection status.

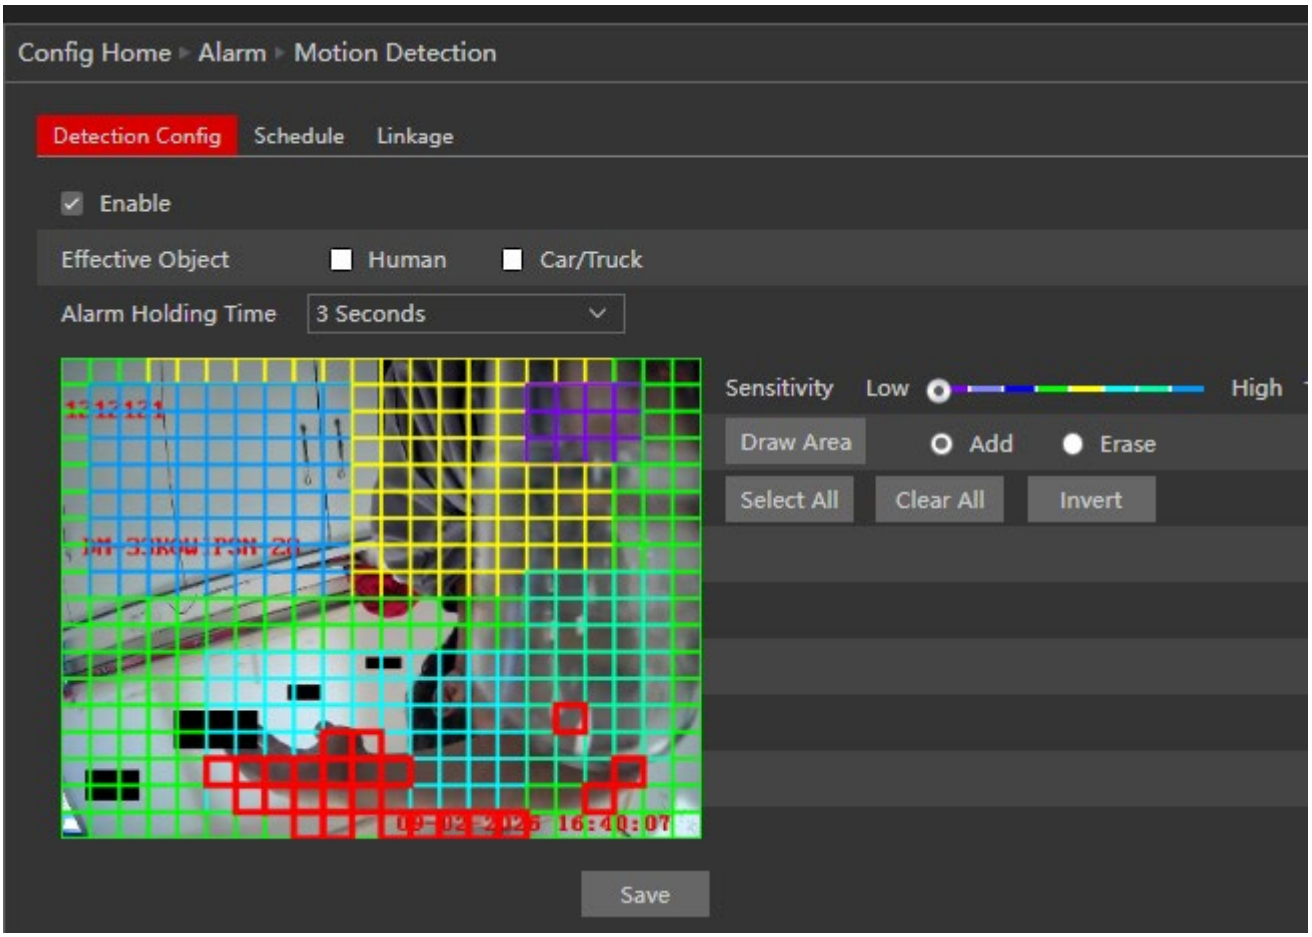

7) CLOUD UPGRADE

Supports firmware upgrades directly via the cloud.

8) Motion grid shows movement indication

Displays real-time movement indication within the motion detection grid.

9)

Notice: 5.3.x doesn't allow FW downgrade
